At last it is here. Thanks to Mohit Mangal!

This brilliant compilation, is aptly named – Parent's Handbook of Careers after School. It is parents that will eventually guide their children and help them take the right decisions. However, looking at the ease with which one can navigate through this book and the quality of information, I am certain that this handbook will be as helpful to school students who are at the stage of launching themselves into a career. And there can be no question on the reliability of information present here. Knowing Mohit, and his perfectionist style, I am certain that the background check must have been done more than once.

This Handbook is also a harbinger of the changing times.Gone are the days when parents thought it as their primary duty to push their child into the only 'Known' professions-engineering, medicine and bureaucracy. I am a product of that system! The present and the future are such that children will be spoiled for choice of careers from a variety that was never imagined before. And Mohit's Book is an indicator of the times to come. Therefore, it is my earnest request to all parents who go through this Handbook to encourage your child to select a career for which the child has aptitude, and not the one that you always wanted for yourself. And for the students who go through this, my only advice is that no career is big or small. It all depends on what you make of it at the end of the day!

I take this opportunity to wish Mohit all the best for all his future endeavors. This world needs many more Mohits to contribute in the empowerment process of school children.

I would like to Congratulate Mr. Mohit Mangal on publishing this compilation named, "Parents' Handbook of Careers after School". In today's world of technology and Internet, information available is plenty but right and consolidated information sources are scanty and I found this compilation very well presented.

The exposure to technology, Media and Social Networking on a larger scale has made our youth aware to a great extent, but they are little aware of the authenticity of information which they are exposed to on a regular basis.Today's Youth believes the Internet to be the most accurate and authentic source of information but, we know all too well, the Internet can often be a cesspool of rumour and chicanery.

Mohit's endeavour to provide correct and consolidated information to our young brigade by giving them whole basket of available options after school is par excellence. I would like to request all the parents, teachers and other stake holders, who are part of decision making for the child's career, to go through this handbook and allow the child to take informed decision based on his/her Aptitude, Personality and Interest.
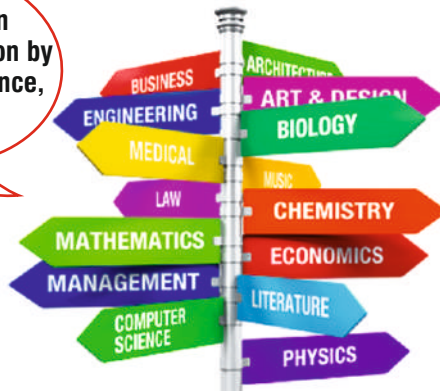

I wish Mohit all the best and encourage him to continue his research and publications which will serve the student community and the public at large for years to come.

FAQs about Career Counseling

What is Career Counseling?

Career Counseling is a process in which an expert helps you with your career exploration, career change, personal career development and other career related issues. This is a process in which the practitioner gives advice on "career" with counseling techniques that simplifies complex decisions and difficult situations for the client. The expert helps you know yourself better using a set of questions (verbal or written). Based on the response, the expert guides you in getting answers to some complex questions which cannot be answered by self.

What is iQue Brain Mapping?

Brain Mapping is "in person Interaction" process with the Counselor, in which the Aptitude of the child is assessed, looking at the comfort and natural bent towards different subjects which the child is exposed to in the previous years of his/her academic or non academic exposure. Following this, in the same "in person interaction", interest of the child is assessed by gauging his top of the mind recall and leisure time spent or desired and lastly, counselor talks to the parent to understand the influence on the child of his/her surroundings along with family/Peer Group/Social impact.

Why is iQue Brain Mapping MOST Effective tool for Career Counseling?

The Brain Mapping method of Career Counseling is MOST effective tool due to three reasons:

1.   Since the process is personal interaction based, each response of the child can be assessed carefully and which response has to be discounted or enhanced, can be taken in consideration by the counselor. (which is impossible in MCQ Written Test)

2.   An open option of deep probing is available, if in any response the counselor feels some disconnect. (This is impossible in MCQ Written Test in 1st round. Only in the second round it can be done, if and only if the counselor is able to figure out the discrepancy, which is extremely difficult.)

3.   Counselor can remove any ambiguity in the response, if found, at any point of time during the interaction. (This is impossible in MCQ Written Test in 1st round. Only in the second round it can be eliminated if and only if the counsellor is able to figure out the discrepancy which is extremely difficult.)

What is Multiple Choice Aptitude Test and why its results are not effective?

A test containing Psychometric questions of multiple choice type, ranging between 100 to 600 in number, to be completed in a given time frame is Multiple Choice Psychometric Test. This test is administered to the child and then the report based on the child's response in form of A/B/C/D options is generated. This tool used for career counseling has loads of drawback.

In my research, I found these tests were built to cater to masses because individual counseling and probing took a lot of time and the scalability was restricted. Also, most of these tests were developed in western countries and were not sufficiently tested and balanced as per Indian needs.

Further in my research, I found that most of the children either do not understand most questions in these tests or after answering a few questions, they do not take the test seriously and just start marking the choices at random. This drastically affects the reliability of the report and thus renders the process inefficient for Career Counseling.

What is DMIT (Dermatoglyphics Multiple Intelligence Test)? Why is it ineffective?

DMIT, also known as "Dermatoglyphics Multiple Intelligence Test" is JUST an empirical study which is associated with biometrics and brain lobes. This study claims to help in understanding a unique inborn potential and personality. This study was conducted by Howard Gardner and he proposed this model in his book in 1983 "Frames of Mind: The Theory of Multiple Intelligences".

This was a research thesis project which showed some correlation between finger prints and Multiple Intelligences. It was picked up by some Marketers who published and marketed it well in third world countries like India, Sri Lanka, Pakistan, Bhutan, Bangladesh, Honk Kong etc. There is NO research or clinical evidence to prove the authenticity of the same. It is like shooting without a target which one will hit every time.

Introduction

This book has been prepared in accordance with "The Gazette of India, July 5, 2014" released in March 2014 (Yes March 2014). This Gazette released by "University Grants Commission" under the head of "Specification of Degrees" says that in exercise of the powers conferred by UGC Act 1956 and in suppression of all earlier Gazette Notifications pertaining to specification of Degrees, the University Grants Commission (UGC) with the approval of the Central Government hereby specifies the nomenclature of the degree for the purpose of the said Section.

Further to this, I have taken in consideration the gazette amendment of 21st July 2015 and of 31st May 2016 for the current compilation.

Although UGC has broadly classified these Specifications in 15 categories for Bachelor Degrees after 12th, but for the ease of the reader, I have skipped few and further sub categorized few classifications and made a total of 20 Categories.

A few Degree Nomenclatures given in this Booklet have been changed or restructured by UGC. But due to popularity of the older nomenclature, I have still incorporated them in the compilation. For ex: A popular degree course BJMC (Bachelor of Journalism and Mass Communication) or BMC (Bachelor of Mass Communication) has been restructured by UGC as BA (Journalism & Mass Communication). Still some universities use the name BJMC or BMC. But the final Degree Certificate which the candidate will get after completion of the graduation will be BA (Journalism & Mass Communication).

Therefore the USP of this book is that any college/institute offering a Degree Nomenclature which shows no presence in this book is either fake or marketed in a different way to attract students.

Happy Reading and Forwarding!

Streams Available after 10th

There are 4 Primary Streams available after 10th in the Indian Education System, namely

Commerce education in India

Commerce is one of the highest opted courses by students across India after 12th. One issue which students face while studying commerce is that they are unable to score well in the area of Accounts and Statistics. This is due to a very simple reason that their Aptitude in the area of Mathematics, Numeric and Analytics is not up to the mark. In such a case continuing with commerce at bachelor level may not be the right approach. The child should shift to a non Commerce/finance field which is not so high on numbers and is relatively more practical or theoretical oriented course. One can look at the 14 areas of education which I have explained in the book, that do not require any specific stream in 11th and 12th.

Arts/ Humanities education in India

Arts also known as Humanities, is an excellent option available after grade 10 in Indian Education system, which a lot of children ignore to even consider. This is because of certain social stigma attached with Arts being a subject or choice of the poor. Being a structural engineer, born and brought up in a family of doctors, my research has inspired me to believe very strongly that one of the BEST EDUCATION one can take to become a great human being and a responsible citizen is "Arts". An education in Arts gives you a completely liberal perspective to think, a different view point to analyse and makes you a socially aware Human. Loads of courses in the book given are inspired from Humanities background.

Business Management education in India

Business Management course is suggested to students who are high on practical, people and logical aptitude. As a course, Business Management is open to students from all streams in 11th and 12th. Any student, who likes to manage people, processes, finances, events etc., is a go getter, able to think out of the box, ready to put in time to do things practically is the right candidate to go for Business Management. MBA has earned a bad name in last 15 Years because the institutes teaching Management have failed to incorporate soft skills like emotional intelligence, interpersonal relationship, goal orientation, time management, team management, positive attitude, effective communication, negotiation etc. But good colleges incorporate these skills and make the candidate sufficiently employable.

Hotel Management Education in India

In India, Hotel Management Education is governed by National Council of Hotel Management and Catering Technology based out of Noida, which was established by Government of India as an autonomous body in 1982. This was focussed to coordinated growth and development of Hospitality Management Education in the country.

The Council regulates academics in the field of Hospitality Education & Training that is imparted at the 21 (twenty one) Central Govt. sponsored Institutes of Hotel Management, 19 (nineteen) State Govt. sponsored Institutes of Hotel Management offering Degree level program; 3 (three) State Govt. sponsored Institutes of Hotel Management offering Diploma/Craft Certificate level programs, 1 (one) Public Sector Unit owned Institute, 13 (thirteen) private Institutes and 9 (nine) Food Craft Institutes that function in different parts of the country.

Through the Council, these institutes offer 11 (eleven) different professional programs leading to award of Certificate, Diploma, Post Graduate Diploma, Bachelor and Master Degree. (The last two programs are in collaboration with Indira Gandhi National Open University).

Also there are many private institutes taking admissions through their individual processes and backed up by big hotel chains like Taj, Oberoi, ITC, Welcom Group, Lalit etc.

Liberal Arts/Studies Education in India

Liberal Arts education can claim to be the oldest program of higher education in Western history. It has its origin in the attempt to discover first principles - 'those universal principles which are the condition of the possibility of the existence of anything and everything'. Liberal Arts contains those subjects or skills that are considered essential for a free person to know in order to take an active part in civic life.

Liberal Arts Education in India is relatively a new concept. In India Liberal Arts/Studies education is assumed to be based on four Pillars namely Commerce, Management, Arts and Science. The pedagogy is designed in a way where a student goes though multiple subjects across the four areas in the first few semesters and then decide for a specialization.

If the child takes up Commerce subject as his major specialization, he/she gets a degree which is B.Com. (Hons.) with or without a Diploma in Liberal arts depending upon the institute of study. Similarly, specialization in Arts will offer a B.A (Hons.), Science will offer B.Sc. (Hons.) and Management will offer BBA (Hons.) Degree at the end of 3 or 4 Years.

Economics education in India

Economics education is right fit for students, who are high on academics and have high aptitude in mathematics, research, data analytics and obviously economics. Many students like economics as a subject in lower grades up to 10th or even 12th because of the linguistic nature of this subject in lower classes. As we go ahead to study advanced level economics, there is a lot of application of higher mathematics. That is the stage at which there are a lot of students who find disconnected with studies. Therefore, I suggest higher studies in economics to only those students who show good comfort with higher mathematics. Some of the highest paying jobs in the world, in the area of data analytics are offered to students from economics background.

FAQs by Parents of 9th - 12th Graders

1.   How do I help my child choose the right career option after school?

Identifying the Aptitude, Personality and Interest (API) of the child is the key to choose the right career option. His/Her comfort in particular subjects at grade 9 and 10 level and further at grade 11 & 12 level shall help us understand his/her aptitude. Observing the child in school, along with friends, society, friends, relatives etc. will give us an insight about his/her personality. Activities which he/she likes being engaged with, will show us his/her interest area. By aligning these three aspects, we can help the child choose the right stream. For deeper understanding of your child, get the child's API testing done. Mr. Mohit Mangal and his team will do the Brain mapping of the child and assess the API to help him/her choose the right course/plan forward.

2.   What are the different Career options after 10th?

In Indian education System, there are only 4 Streams available after 10th. The child can choose to take Science A-Group (Physics, Chemistry, and Mathematics), Science B-Group (Physics, Chemistry, and Biology), Commerce Group (Accounts, Statistics, Economics and Business studies) or Arts/Humanities Group (History, Geography, Psychology, Political Science and Sociology). If the child does not wish to carry on with Main stream academics, he/she can also shift to skill based programs after 10th. These skill based programs can be either Diploma or Certification in the area of Engineering, Medicine and Rehabilitation sciences or they can be in general areas like Hair care, Beautician, DJ/VJ/RJ, Event Management, Travel and Tourism, Export Import Etc.

3.   What are the different career options after 12th?

University Grants Commission (UGC), which is the parent regulatory body of education in India under the Ministry of HRD, has broadly classified education in 15 broad areas after 12th for Bachelor Degrees. For the ease of understanding of the parents and students, I have sub categorized a few areas and made a total of 20 classified Categories in which a child passing from grade 12 can take bachelor's degree in. Out of these 20, there are 14 areas of education, in which a student can take Bachelor Degree walking out of ANY STREAM be it Science, Commerce or Arts & Humanities after 12th.

4.   My child is not good at Maths, will a lot of streams get closed for him if he leaves Maths after 10th?

No, for all the 14 general degree areas (as stated above) open to any stream, no mathematics is required in grade 11/12. Even Entrance Exams at all levels, be it Bachelor or Master, always expect the child to have knowledge of only 10th Level Maths. Higher Maths is not required for any General Entrance exam. Be it GMAT, GRE for international studies or CAT, CMAT, XAT, NET Etc. for Domestic Education. So, the child shall not be at loss anywhere.

5.   My child wants to follow his friends and go in the same stream after 10th/12th. What should I do?

Mr. Mangal very Commonly say ,"Do not Follow Friends or Trends". Please do not allow your child to follow the same stream which the friends are taking. For deeper understanding of your child, get the child's API testing done. Mr. Mohit Mangal and his team will do the Brain mapping of the child and assess the API to help him/her choose the right course/plan forward.

6.   We want our child to join family business. Which course is most suitable for him/her?

The course which he/she has the best interest in is the most suitable course. Pushing the child in a degree program matching your family business may not be the right thing to do. Rather give him/her a course of his/her interest which will make the child smart. Subsequently he/she will be in a position to take your business forward in a better way.

7.   My child has a very wavering mind. He/she comes up with a different choice every now and then. What should I do?

At this age, all the three parameters, Aptitude, Personality and Interest change very fast. So, in a way it's good if he has wavering mind because at least he/she is observing, thinking and trying to explore. You can take help from an Expert Career Counsellor. For deeper understanding of your child, get the child's API testing done. Mr. Mohit Mangal and his team will do the Brain mapping of the child and assess the API to help him/her choose the right course/plan forward.

8.   I want my child to take up my profession, but am not sure if he/she will be able to do that?

You can take help from an Expert Career Counsellor. For deeper understanding of your child, get the child's API testing done. Mr. Mohit Mangal and his team will do the Brain mapping of the child and assess the API to help him/her choose the right course/plan forward.

Students' FAQs

1. **What Course/Stream shall I choose if I wish to appear for IAS/IPS/UPSC/Civil Service Examination?**
- Any candidate with minimum 21 Years of age and having completed Graduation from **ANY STREAM** can appear for the Exam. Traditionally Students preferred BA as graduation because that degree gave time for preparation, but off late I see students from all fields, be it Medicine, Engineering or Commerce cracking the exam. One latest trend which I see is students go 5 Year Law after 12th and then give UPSC Exam. This helps them in three ways: Firstly, the legal studies are in line with the study requirements of UPSC, so preparation takes place automatically. Secondly, Legal Studies also opens door to Judiciary Examinations. Thirdly, even if the candidate is unable to clear the exam, he/she has a professional degree in hand and can pursue profession as a lawyer.

2. **What are the pre requisites of Architecture?**
- Students who are good in both creativity and Mathematics (Eligibility being any Stream in 12th with Maths) are the right candidates to pursue Architecture. One needs to pursue Higher Maths after 10th to appear for competitive exams for Architecture like NATA, JEE-MAIN (PAPER-2) Etc.

MOHIT MANGAL

A Complete Career Guide

About the Author

Trained in Structural Engineering along with a Master's Degree in Management under his hat, Mr. Mohit Mangal is a Nationally Renowned Career Counselor and Social Entrepreneur. He quit his cushy job in a top FMCG Company in 2003, against much reservations and apprehensions of his peers, since he felt driven by the quest to help students find their right career path.

Having found his own path the hard way around, he was equipped with the detailed know-how of the dilemmas that students face and the challenges that the very dynamic professional market throws at the student community. He felt confident about guiding them in the right direction.

Today, more than 17 years later, Mr. Mohit Mangal is one of the most popular, successful and well-known motivational speaker and career counselor who has delivered more than 1500 talks across India and helped more than 5 lakh students identify their right path forward. Driven by the assurance of having made substantial difference, and motivated by the zeal to surpass his own self, Mr. Mohit along with his team continues to deliver career awareness workshops, design and use Self-Assessment tools for school and college students, and offer guidance to more than 1,00,000 students each year. He also works with college students and professionals, who need help in identifying and fine tuning their Career Goals at different points in their professional life to attain even higher goals.

He has been a Guest Faculty at some of the premier institutes of the nation including IIT-Delhi, IIT-Mumbai, IIM-Ahmedabad, IIM-Bangalore, National Institute of Design, National Institute of Fashion Technology and Gujarat Institute of Disaster Management to name a few.
